International Day of Clean Air for Blue Skies

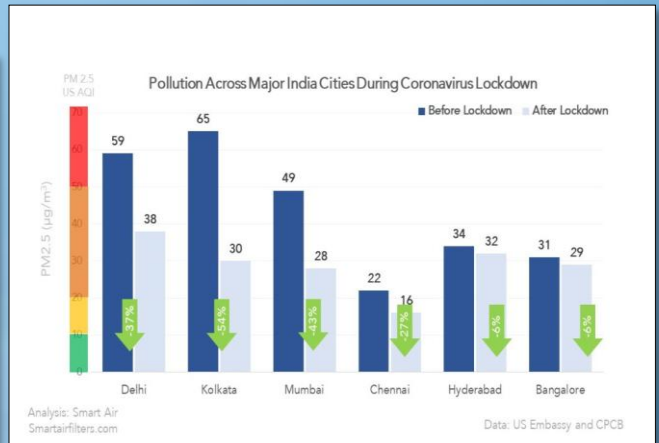

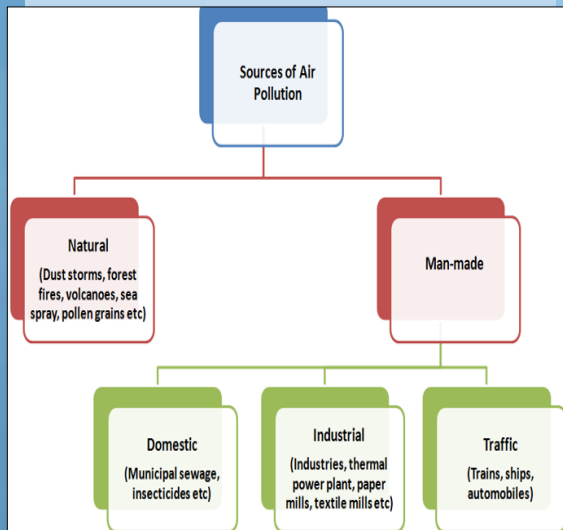

CLEAN AIR FOR ALL

“The United Nation General Assembly adopted the resolution on December 19, 2019 to hold an International Day of Clean Air for Blue Skies”. The first celebration will set a precedent for an important and exciting new international day for clean air to be celebrated annually.

The day aims to:

- Raise public awareness at all levels—individual, community, corporate and government—that clean air is important for health, productivity, the economy and the environment.
- Demonstrate the close link of air quality to other environmental/developmental challenges such as – most and foremost – climate change and the global Sustainable Development Goals.
- Promote and facilitate solutions that improve air quality by sharing actionable knowledge best practices, innovations, and success stories.
- Bring together diverse international actors working on this topic to form a strategic alliance to gain momentum for concerted national, regional and international approaches for effective air quality management.

Air Pollution

COVID-19 lockdown have not only changed people's lifestyle but also have decreased the pollution levels. The lockdown reduced concentrations of harmful particles across all five cities, from a 10% reduction in Mumbai up to a 54% reduction in Delhi.

Tips for reducing air pollution

Travel light

Teleconference

Plant native trees

Recycle and use recycled products

Renewable energy

Stop garbage burning

Use compact fluorescent light bulbs.
