

International Day of Forests

Forests and Biodiversity
21st March 2020

Strategies:

- Protect habitat
- Reduce fragmentation
- Control introduced animals or plants
- Sustainable harvesting practices
- Reduce pollution
- Encourage plantation

India is a 'megadiverse country' with only **2.4%** of the world's land area and yet about **7-8%** of all recorded species.

Socio Economic Outlook 2020 Planning department, Gov. of Telangana

At the National level, India's forest cover is **21%**.
The State has reported a recorded forest area of **26,004** which is **24.00%** of its geographical area.

Forest Survey of India, Telangana
